

Hobart City Council wants to squeeze 7850 new residents into Sandy Bay/Mt Nelson

Hobart City Council staff have admitted that their goal is to swell the population of Sandy Bay/Mt Nelson by an extra 7850 people, an increase of 47.6% .

To achieve this massive growth HCC staff supports the relocation of the Sandy Bay UTAS campus, ignoring the views of 74% of the people of Hobart. These disclosures came during the Council's public consultation on a long-term Mt Nelson/Sandy Bay Neighbourhood Plan .

SaveUTAS has accused the Council of deceiving the community during this consultation process. Council staff did not reveal their true intentions until just before the closure of the public online survey on the proposed Plan.

SaveUTAS says the entire public consultation process (stakeholder meetings, community workshops and the online public survey) has been carefully contrived by HCC staff to ensure the community was not aware that the Plan would support UTAS relocation.

HCC staff made sure the UTAS move and its implications for Sandy Bay/ Mt Nelson were not discussed or explored by the community.

The SaveUTAS position is that both the survey and the public consultation process are flawed because:

- (a) the Council has concealed its intention to use the Plan to increase Sandy Bay/Mt Nelson population by 7480, equal to 48%.
- (b) the Council designed the survey and public consultation process to prevent community discussion on the implications of UTAS relocation and massive population increase.

Consider **adding a comment** at the end of the survey or through a submission.

An example survey response is available on our webpage or Facebook page.

Complete the online survey and/or **make a submission** by **31 December 2023**. *SaveUTAS* is particularly concerned about ideas 7 & 8 and do not support either.

If you can't access it contact the City of Hobart.
